#### General Instructions for Personnel Employed Report

Provide the number of full-time equivalent personnel employed and contracted to provide special education and related services on or about December 1, 2000. Do not count teachers and other instructional personnel who are serving children from birth through age two.

For Section A, Special Education Teachers Employed to provide special education to children ages 3-5: report the number of preschool teachers, itinerant/consulting teachers, and home/hospital teachers employed for children with disabilities in this age group. This count should include teachers of children with disabilities in separate schools and facilities. Do not include regular preschool teachers who work with children with disabilities.

For Section B, Special Education Teachers Employed to provide special education services to children and youth ages 6-21: report teachers of separate classes, resource room teachers, itinerant/consulting teachers, and home/hospital teachers, as well as special education teachers who teach in regular education classrooms. This count should also include teachers of children with disabilities in separate schools and facilities. Do not include regular classroom teachers who work with children and youth with disabilities.

<u>PLEASE NOTE:</u> all personnel providing services to students with speech- language impairments (speech-language pathologists, speech therapists, speech teachers) will be counted in Section B. Personnel with an endorsement code 7901, holding either a masters' level endorsement in speech-language disorders or a "grandfathered" bachelor's level endorsement (speech-language disorders Pre K - 12, New) should be reported as fully licensed. Persons with the old bachelor's endorsement (speech-language disorders NK-12, endorsement code 7900), or a conditional license or provisional license are to be reported as not fully licensed.

**For Section C, Other Special Education and Related Services Personnel**: report the number of FTE other special education/related services personnel, by type of personnel employed to provide special education and related services for children with disabilities ages 3-21.

The assignment of a teacher or staff member is determined by the primary disability of the student served, not by the teacher's license or endorsement. When teachers provide special education to students with different disabilities, apportion the full-time equivalencies of these teachers' time according to the primary disabilities of the students served. For example, if a teacher has 20 students, 10 with learning disabilities, 5 with mental retardation and 5 with emotional disturbance, the report should indicate .50 teachers under learning disabilities, .25 teachers under mental retardation and .25 teachers under emotional disturbance. These percentages should be reported as "fully licensed" or "not fully licensed" depending on the teacher's endorsement for each of the disability categories.

## Specific Column Instructions, All Sections (A, B, C)

Column (1) In Sections A and B, report the number of FTE personnel employed or contracted to

provide special education and related services on or about December 1, 2000 who had a state license, with appropriate endorsement, for the position held. In Section C, use this column to report staff in personnel categories for which there are no licensure requirements but the staff meet existing State standards or requirements for the position held. Also in Section C, use this column if there are no State requirements for a particular position.

- Column (2) Report the number of FTE personnel employed or contracted to provide special education and related services on or about December 1, 2000 who were employed on a conditional license, or a provisional license. That is, they have a teaching license but do not hold the proper endorsement for the position to which they were assigned or they did not meet other existing state requirements for the position. This includes long-term substitutes.
- Column (3) Add the numbers in columns (1a), (1b), and (2) to obtain the total demand for special education and related services personnel on or about December 1, 2000.
- Column (4a) Report the number of FTE personnel employed or contracted to provide special education and related services on or about December 1, 2000 who had appropriate state licensure for the position held, and who were employed in the same school district in the same position during the 1999-00 school year.
- Column (4b) Report the number of not fully licensed FTE personnel employed or contracted to provide special education and related services on or about December 1, 2000 who were employed on a provisional license, or other basis and who were employed by the same school district in the same position during the 1999-00 school year, and under the same circumstances.

### **Specific Row Instructions**

#### **Section C**

This section should not include staff already accounted for in Sections A and B. Staff reported in Section C should be listed in column (1), fully licensed, if there are no licensure requirements but they meet the state standards or requirements for the position held. Also use this column if there are no State requirements for the position.

Row (14) Fully qualified educational interpreters are persons who hold a Virginia Quality Assurance Screening Level III or IV from the Virginia Department for the Deaf or Hard of Hearing; any Registry of Interpreters for the Deaf Certificate (excluding the Certificate of Deaf Interpretation); or a Translitering Skills Certificate from the Testing, Evaluation and Certification Unit (TECUnit) for cued speech transliterators. Persons holding no

VQAS level, VQAS Level I or VQAS Level II certification should be considered "not fully licensed".

Row (16) Report the number of other professional staff employed and needed to provide special education and related services for children and youth with disabilities ages 3-21. Include personnel who provide specialized health services (nurses, psychiatrists, etc.), specialized food service, specialized pupil transportation, and other occupational therapists, etc. Persons must hold the appropriate license for their profession (e.g. Board of Audiology and Speech-Language Pathology license for audiologists, Board of Nursing for nurses, Board of Physical Therapy for physical therapists).

NOTE:

Teachers and other personnel employed in regional programs must be included in this report. The participating school divisions must decide how to include these teachers in one or more of the divisions' reports (i.e. one of the participating divisions counts all the teachers in their report or the total number of teachers is split among the participating divisions). Teachers in regional programs should only be counted once.
